

Press conference: Saturday, August 27, 2022 13:00 a.m.

We cordially invite you to our press conference

Meeting point: Vöhringer **INNOVATION STAGE 2022**

Hall 13 A 95

Let Vöhringer present you the latest interior design solutions for motorhomes and caravans. Talk directly with responsible developers and designers.

As an absolute highlight, a very special cooperation project is waiting for you at this year's INNOVATION STAGE, which makes the access into camping possible for everyone. Be curious!

This year, our proven materials from the V.I.T Vöhringer Innovation Technology Series, such as VFLEX, VUNDER TECH, VSTRONG and V3D Composite, are used as source material for the illustrative objects. Due to the intelligent and innovative combinations of these materials and the increasing requirements for lightness and modern interior designs, almost nothing is impossible from now on.

We push lightweight construction to its limits without sacrificing technical properties.

Be the first to learn all about our solutions in lightweight construction at a top level.

For super-light interior trim, we are increasingly using fleece from our V-Flex products this year to create a modern living room atmosphere. In previously unknown material combinations, we will show you what is possible in furniture construction for the caravan and motorhome industry - let us surprise you. This development of products will change the caravan and motorhome industry sustainably. This is one of the reasons why we have already switched to 100% climate-neutral production in 2021.

We look forward to your coming
